

SAYOK BISWAS

CSE Student @ PSIT Kanpur | Aspiring Software Engineer | DSA (C++) | React | Python | AI & GenAI
sayokbiswas538@gmail.com | +91 7272916600 | LinkedIn: sayok-biswas-479123387 | GitHub: SAYOK3117 | LeetCode: sayok_biswas__07

OBJECTIVE

Computer Science and Engineering student at PSIT Kanpur with hands-on experience building AI-powered applications, frontend systems and intelligent software prototypes. Strong foundation in C++, Python, JavaScript, Data Structures & Algorithms and React, with growing expertise in Generative AI, LLMs and Agentic AI. Seeking opportunities to apply software development and AI skills to real-world engineering problems.

EDUCATION

Pranveer Singh Institute of Technology (PSIT), Kanpur — Bachelor of Technology — Computer Science & Engineering | 2025–2029 | Dr. A.P.J. Abdul Kalam Technical University (AKTU)

Scottish Public School, Katihar — Intermediate / Class XII | 2023–2025

Ramakrishna Mission Vidyamandir, Katihar — Junior & High School / Class X | 2010–2023

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, HTML, CSS

Frontend: React.js, Vite, Tailwind CSS

Backend: Node.js, Express.js, FastAPI

AI / GenAI: Generative AI, LLMs, Agentic AI, Prompt Engineering, AI Integration

Databases: PostgreSQL, Firebase, Supabase

Libraries / Technologies: Leaflet.js, OpenStreetMap, GeoJSON, REST APIs

Tools: Git, GitHub, VS Code, Antigravity IDE

Core Concepts: Data Structures & Algorithms, OOP, Frontend Development, API Integration

PROJECTS

ORCA — Marine Ecosystem Reasoning with Collaborative Agents

Smart India Hackathon 2026 — Current SIH Problem | Round 2 — Ongoing | *React, TypeScript, Vite, Tailwind CSS, Python, FastAPI, Agentic AI, Leaflet*

- Developing an Agentic AI-based marine intelligence platform using collaborative specialized agents for marine ecosystem analysis and decision support.
- Built an operational dashboard for multi-agent reasoning, environmental intelligence and marine advisories, including a 5-Agent Neural Brain and tactical map interfaces.
- Implemented geospatial visualization using Leaflet and OpenStreetMap and an explainable multi-agent workflow for advisory generation.

TrainControl — Intelligent Train Control System

College SIH Internal — Secondary Project | August 2026 | *Python, AI, Reinforcement Learning, Simulation*

- Developed an intelligent train-control prototype for the college SIH internal process, exploring AI-driven train scheduling, control and operational decision-making.
- Built simulation and comparison components to evaluate generated scheduling/control strategies and demonstrate intelligent railway operations.

AI-Based Grievance Chatbot — Nagrik Setu

College SIH Internal | July 2026 | *React, TypeScript, Vite, Tailwind CSS, Leaflet, AI*

- Developed an AI-based grievance-management solution for SIH1516 Nagrik Setu with monitoring, tracking, escalation and administrative follow-up workflows.
- Built a Super Admin Dashboard with KPI analytics, notifications, escalation management, India map visualization and heatmap-based grievance analytics.
- Designed an SLA-driven workflow tracking grievance status, escalation history, responsible authority and deadlines.

SmartFlow — AI Traffic System

Scaler School Project | February 2026 | *Python, Flask, JavaScript, AI, Multi-Agent Systems*

- Developed an AI-based traffic management system for intelligent traffic monitoring and control, with dynamic traffic-management logic based on changing traffic conditions.
- Built simulation and interactive web components for traffic-flow visualization and intelligent signal-control decisions.

AI Interviewer

College Mini Project | January 2026 | *AI, JavaScript, Web Development, LLM Integration*

- Developed an AI-powered platform to simulate technical interview sessions through an interactive AI-assisted interview workflow.
- Built candidate-focused functionality for structured interview preparation and practical application of AI in recruitment.

ACHIEVEMENTS & HACKATHONS

- Smart India Hackathon 2026 — ORCA, current SIH problem; Round 2 ongoing.
- College SIH Internal — AI-Based Grievance Chatbot (Nagrik Setu) and TrainControl secondary project.
- Built multiple 2026 AI-focused projects spanning Agentic AI, traffic management, railway systems, grievance management and AI-powered interviews.

CERTIFICATIONS

- Coursera — Prompt Engineering with GPT: Programming for Custom Content
- Coursera — Machine Learning Specialization, DeepLearning.AI (Ongoing)
- HackerRank — Java Certification
